

Monitoring

With 6 different personalised numbers CarePhones can be monitored by your family and / or a care centre 24 hours a day.

Choices

Family and loved ones:

Home and mobiles numbers can be programmed into your CarePhone. So at any time your family and friends can provide assistance as required.

Monitoring by a Care Centre:

Care Centres are specially designed for the Aged Community with specially trained staff who understand the requirements and needs of your elderly family members. These care centres are available 24 hours to help with all emergencies:

"no task is too small"

Safety Net:

Having your family monitor your CarePhone sometimes requires an extra "Safety Net". This is where the CarePhone is also monitored by the Care Centre and if at anytime your family is not available the call then redirects to the Care Centre. Your security is guaranteed by **Safety Net**.

our motto

PERSONAL MEDICAL ALARM

Leading an Independant life
requires only a phone call.
THAT'S PEACE OF MIND

Personalize your Pendant

CareTech Pendants can be quickly clipped together in many ways. This provides the wearer maximum comfort.

Everything Supplied

The Pendant can be worn as a Necklace, Watch or on a Belt All these accessories are supplied and within minutes the wearer has something comfortable for themselves.

Wrist Strap

CareTech designs and builds their pendants to be fully waterproof. You can quickly change the battery without having to send the unit away ensuring that your safety system is with you always.

CareTech has also designed a special clip on accessory for arthritis patients, making pushing the alarm pendant a simple function.

Simple Function

PUSH YOUR BUTTON TO ACTIVATE ALARM

CAREPHONE CALLS LOVED ONES OR A CARE CENTRE

THEY SPEAK DIRECTLY TO YOU, AND THEN SOLVE THE PROBLEM

GO BACK TO NORMAL LIFE!

The CarePhone has a built in loud speaker and microphone, you do not need to pick up the phone.

Just press the button and talk.

CarePhones

Our CarePhones are simple and easy to install in fact just plug in the phone line and you are online. No power point required.

CareTech offers many accessories with its CarePhone to make living even easier:

- Smoke detectors*
- Movement sensors*
- Bed, floor and toilet mats*
- Dementia monitoring*

The CarePhone receives radio signals from all its accessories and then simply dials the pre-programmed numbers to open a loud speaking voice path which provides instant communications from all rooms in the house.

CareTech also has radio repeaters for those who have a love of gardening.
