Call for care

Alarm function

Button reset

LED indication

Table Button

The CareTech Table Button is a mobile alarm device that can be used on the night table next to the bed as well as on the front desk or on a table in the common dining area. Individuals who need to call for attention activate the alarm by pressing the table button. When assistance arrives the call can be reset at the unit itself. Each button is individually coded. The table button can easily be connected to CareTech's nurse and warden call system and to CareTech carephones.

At CareTech we develop our products and solutions in collaboration with customers and users. CareTech products and know-how offer users, care staff and relatives a reassuring complete solution that gives them extra peace of mind.

Table Button

The table button contains a transmitter that is activated by pressing the button on top. An LED lights up to confirm transmission and show that the battery status is OK. The range covers a normal house or apartment.

Battery operation approximately 3 years in normal use. Easy battery replacement.

Technical data

- Battery type 12 V, MN21
- Dimensions 70 x 70 mm
- Article number: 951P8A

Approval

CE-marked. Complies with relevant standards:

Manufactured in accordance with the new RoHS directive, 2002/95/EC

(Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment)
